2026

What Inside

Start — What Lovable is
Chapter 1 — How Caveman Start
Chapter 2 — Talk to Lovable — Make App
Chapter 3 — Plan Mode and Build Mode
Chapter 4 — Fix, Change, and Make Better
Chapter 5 — Publish and Own Code
Chapter 6 — Credits, Plans, and Smart Use
Appendix — Words Caveman Need Know

Start

What Lovable Is

Caveman have idea. Caveman no want write many code. Caveman speak idea in simple words. Lovable listen. Lovable make real web app. App have pages, buttons, data, login if caveman want. Code is real React code. Caveman can see it, change it, keep it.

Lovable is tool that turn words into working software. No need big computer brain. Just describe what caveman want. Lovable build frontend, backend, and more.

REMEMBER

Lovable make production-ready code. Caveman own the code. Can sync to GitHub. Can publish live app.

Chapter 1

How Caveman Start

Go to lovable.dev. Sign up free. Free plan give some credits every day. Enough to try.

1. Open browser. Go lovable.dev.

2. Make account. Free is good start.

3. Click make new project.

4. Tell Lovable what app caveman want. Simple words.

5. Watch Lovable build. See preview.

> **TIP**
>
> Start small. Say “make simple landing page for my idea” first. Then add more.

Chapter 2

Talk to Lovable — Make App

In project, there is chat. Caveman type what want. Lovable understand and build.

Good Ways to Speak

Be clear. Say “Add login with email and password.” Or “Make dashboard that show my data in chart.” Or “Change button color to blue and make it bigger.”

Lovable has modes. Chat mode for talk only. Plan mode for think and make plan first. Build mode for do the work.

> **REMEMBER**
>
> Small change cost less credits. Big change cost more. Watch credits.

Chapter 3

Plan Mode and Build Mode

When idea is big or caveman not sure, use Plan mode first. Lovable look at project, make plan, ask questions. Caveman read plan, say yes or change it. Then Build mode make the changes. Plan mode no touch code until caveman approve.

Build mode is when Lovable just do it. Good for small fixes or when caveman know what want.

> **TIP**
>
> Use Plan mode for new big features. Save credits and get better result. Use Build mode for quick fixes.

Chapter 4

Fix, Change, and Make Better

App not perfect first time? Tell Lovable what wrong. “Button not work.” “Make this page look better.” “Add search.” Lovable fix and improve.

Caveman can also look at code if want. Or sync project to GitHub. Then use own tools later if need.

Chapter 5

Publish and Own Code

When app ready, publish it. Free plan give lovable.app domain. Paid plan let caveman use own domain and remove badge.

Code is yours. Connect GitHub so code live in your repo. Then you can deploy anywhere or keep working in Lovable.

REMEMBER

Lovable handle hosting and many backend things. But caveman own the project and the code.

Chapter 6

Credits, Plans, and Smart Use

Lovable use credits. Free plan give few every day. Pro plan cost about $25 month and give more credits. Business for teams. Credits roll over on paid plans. Check pricing page for latest numbers.

Plan	About Price	Credits	Good For
Free	$0	Few daily	Try it
Pro	~$25 / month	More (100+)	Real projects
Business	~$50 / month	Team features	Groups

Numbers change. Always check lovable.dev for current plans.

Smart Caveman Tips

• Start free. See if you like it.

• Use Plan mode for big ideas so you do not waste credits.

• Make small requests. Cheaper and better results.

• Publish and test often.

• Sync to GitHub so you keep the code forever.

WARNING

Credits finish? Building stop until more credits. Watch balance. Buy more or wait for next day/month.

Appendix

Words Caveman Need Know

Credits: Points Lovable use when you talk and build. Free give some every day. Paid give more.

Plan Mode: Think first. Make plan. No change code until you say yes.

Build Mode: Do the work. Change the app now.

Chat Mode: Just talk. Ask questions. No change code.

Project: One app you are building.

GitHub Sync: Send your code to GitHub so you own it outside Lovable too.
